I Accidentally Got a Butler

WHAT HAPPENS WHEN A NON-TECHNICAL PERSON SETS UP THEIR OWN PERSONAL AI ASSISTANT — AND ACCIDENTALLY BUILDS A FARMHOUSE-HUNTING DATABASE IN THE PROCESS.

My Secret Butler

ACCIDENTALLY HIRED AN AI

A month ago, I did something that sounded like science fiction: I set up my own personal AI assistant. He lives in my phone, knows my to-do list, and even reads my emails.

Beyond The Chatbot

IT'S MORE THAN AN APP

Meet Dobby. He's not just a conversational tool, but a diligent digital domestic. He's currently compiling farmhouses, cross-referencing aircraft noise and UK flood risk data.

Code Broke The Internet

THE OPEN-SOURCE PHENOMENON

This isn't just my little secret. The engine behind it, OpenClaw, hit **300,000 GitHub stars** faster than almost anything. People are buying Mac minis *just* to run it.

Not A Developer

AI FOR THE REST OF US

Confession: I'm spectacularly *not* technical. My AI setup involved what I call 'interpretive troubleshooting,' asking Claude to dumb down error messages like I'm a bright 12-year-old.

The Pain Is The Point

EDUCATION THROUGH CHAOS

It's not always sleek, but the friction *is* the education. Every break, every fix, teaches me a bit more about what's actually under the bonnet. I'm happy to pay that price.
